

JOB DESCRIPTION

JOB TITLE	.NET Software Developer
REPORTING TO	Software Development Team Leader
PROPOSED SALARY	TBC

OVERVIEW

Intelligent Ltd. is the leading UK system integrator for solutions based on Radio Frequency Identification (RFID) technologies, which are already revolutionising many areas of business where bar codes have previously dominated. Part of the £1.2 billion LINPAC Group, Intelligent Ltd has already secured the world's largest contract for the roll-out of RFID technology in the retail supply chain.

To support our growth, we are looking for a .NET software developer to work on both new and existing cutting edge technology projects within libraries and retail supply chains. This is a role that will require the individual to be a disciplined and conscientious software developer, with experience of .NET (C#) and SQL Server. Our dynamic, team-based environment requires commitment and hard work to ensure we continue to deliver quality solutions.

Applicants should be eager to progress and develop both their technical and personal skills.

KEY JOB RESPONSIBILITIES

- Develop software to technical specification and within agreed timescales
- Produce functional and technical specifications in accordance with customer and project team input
- Development of user interfaces. Good understanding of the interaction between users and process
- Develop software to internal coding practices and standards
- Produce support and release documentation
- Liaise with testing personnel and to unit test software in accordance with Intelligent's QA standards.
- Provide technical guidance to Intelligent customers and staff
- Provide support to the Intelligent help desk and other Intelligent personnel in the resolution of software issues
- Diagnose problems and produce software fixes
- Monitor personal performance against agreed goals.
- Deputise for the team leader as and when necessary
- Perform any other duties as and when required
