intelligent

smartServe Lite™

low cost self-service kiosk

Low cost solution

By removing the premium features such as payment and integrated returns, the unit is able to be supplied at a low cost without compromising on quality.

Optional payment module

An optional module is available for the addition of payment options, including, chip & pin, coin and note. The module also features a change mechanism.

Unique read aperture

The kiosk features a central read aperture, which ensures that all items contained will be processed and that material outside of the area will be undetected.

Large touchscreen

As with all our self-service solutions smartServe Lite™ features a large 19" touchscreen, positioned within convenient reach and DDA regulations.

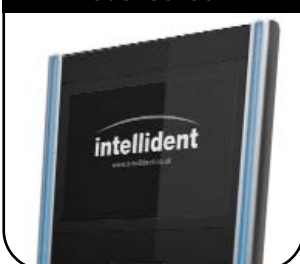

Modern design

smartServe Lite™ has been designed as a modern, unique looking terminal to stand out in a library and attract users - it is provided in a choice of 2 colours.

Small footprint

An incredibly small footprint allows smartServe Lite™ to be placed almost anywhere in the library, and in areas where a full desk-based solution is not appropriate.
