

smartSafer™

on-shelf security for audio and visual media

The Range

Introducing the smartSafer™ range of secure, lockable cases for Audio-visual media. The smartSafer™ cases are designed to retain the AV disk in the box and on-shelf, allowing customers to independently borrow media items, with no requirement for staff intervention.

Using a detacher device, the case is opened and locked in one single movement. Available for CD, DVD and Blu-Ray, the casing can be supplied as single cases or, by using unique click-in inlays, can be converted to accommodate multiple disks. For the first time standard book RFID tags can be affixed to the case rather than to the disk to provide secure operation.

The Locking Device

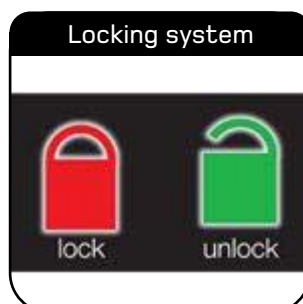

The case is a self contained unit, meaning that no additional parts can be lost or require management and storage.

Time Saving

As the smartSafer™ is designed for self issue, the AV media can remain in the box, locked on-shelf. The patron can read the packaging on the case but cannot remove the disk unless the case has gone through self issue. Library staff do not need to store empty cases on the shelf and the AV disk separately, nor do they have to search for the disk when the case is presented for issue.

Robust and Durable

The smartSafer™ is made from polypropylene and ABS plastic.

Order code(s)	<p>INT-EQUI-10001, smartSafer™ inlay (CD 2 additional disks)</p> <p>INT-EQUI-10002, smartSafer™ Detacher (DVD/CD)</p> <p>INT-EQUI-10004 smartSafer™ (CD, 1 additional disk)</p> <p>INT-EQUI-10005 smartSafer™ (DVD, 1 disk)</p> <p>INT-EQUI-10007 smartSafer™ inlay (DVD 1 additional disk)</p> <p>INT-EQUI-10037 smartSafer™ (Blue-ray Disc, 1 disk)</p> <p>INT-EQUI-10038 smartSafer™ inlay (Blue-ray Disc, 1 additional disk)</p>
